## THE RIDDLE OF THE CARPATHIAN SPHINX

DISCOVER YOUR PAST

No matter how the planets move across the sky, there will always be an infinite number of extinctions. Intelligent species will disappear forever into the abyss of time.

This cycle has been true for millions of years of evolution. Our days, as well as the days of our ancestors have been and are numbered.

The question is, could they, the ones who will come after us, remember us, and our story?

Or will they forget us, and simply assume that they have superiority and supremacy on earth?

THE RIDDLE OF  
THE CARPATHIAN  
SPHINX

# SYNOPSIS

The documentary film *The Riddle of the Carpathian Sphinx* is the first film and film series about this magnificent monument generally considered by scientists to be a natural monument. But is that the case? Dr. Robert M. Schoch, famous, renowned American professor and geologist, the first expert in ancient

rock who redated the geological age of the Egyptian Sphinx and Oana Raluca Ghiocel, film producer and director, embark on a special mission to research the field onsite and uncover the possibility of a past that could rewrite the history of ancient times, a history that could redefine us, revealing a new identity.

DO YOU KNOW  
YOUR PAST?

”A film that resonates with all of us, a fascinating chapter in world history that must be known by as many people as possible.”

**CHARLES MAPLESTON, BBC PRODUCER**

”The Carpathian Sphinx is an invaluable monument, a rock with an overwhelming importance for humanity. I have no doubt that the area of the Carpathian Sphinx and Bucegi Mountains were a cultural nucleus, a prehistoric mecca during the Ice Age, tens of thousands of years ago.”

**DR. ROBERT M. SCHOCH**

The film presents very rare archival material such as images from the Peruvian historian Daniel Ruzo's trip to the Carpathian Mountains in 1968.

“I think that when we look for this lost civilization, there may have been many lost civilizations, but they may not have been as many people would expect them to be. That means that they weren't a mirror image of who we are today.”

**DR. ROBERT M. SCHOCH, GEOLOGIST**

“Human evolution is the main starting point, the beginning of everything that has followed in terms of understanding humanity, where it is now, and where it is headed.”

**VIKTOR DEAK, AMERICAN EXPERT IN PREHISTORIC RECONSTRUCTIONS**

**T**HE RIDDLE OF THE CARPATHIAN SPHINX is based on detailed reconstructions of the prehistoric human's universe illustrated by experts and international specialists in reconstructing prehistoric people from human fossils found in archeological sites.

” “A captivating and exciting original program that inspires all my admiration.”  
**BILL COTE, DIRECTOR THE MYSTERY OF THE SPHINX**

” “I hope that the research undertaken by Oana Raluca Ghiocel and I onsite in the Bucegi Mountains will open your eyes to a new way of looking at prehistoric people and humanity.

I am proud of what I have achieved so far, which can be seen in the Riddle of the Carpathian Sphinx. However, the investigation is not over. We still have a lot to learn.

For us, it was an exceptional journey into the distant past, from which we can draw many lessons.”

**DR. ROBERT M. SCHOCH, GEOLOGIST**

# DR. ROBERT M. SCHOCH

Dr. Schoch has been a full professor at Boston University since 1984, and earned his Ph.D. in Geology and Geophysics from Yale University (USA).

He holds a bachelor's degree in geology from George

Washington University in Washington (USA). Dr. Schoch is known for his groundbreaking research dedicated to ancient cultures and monuments in various countries such as Egypt, Turkey, Peru, Mexico, Easter Island, Japan and Wales.

He is the author of scientific as well as popular books, such as *Forgotten Civilization*, *Voices of the Rocks*, *Pyramid Quest*, *Voyages of the Pyramid Builders*, etc.

Dr. Schoch has had many media appearances on the BBC, National Geographic, History, Discovery, NBC, ABC etc.

# OANA BALUCA GHIOCEL

Oana is an award-winning documentary filmmaker and director, consultant, editor and screenwriter. She has produced independently 2 feature films, the RIDDLE OF THE CARPATHIAN SPHINX being her third feature film.

Oana holds a Master of Arts in Documentary Film and Production from Emerson College (Boston, USA), and also a Bachelor in Fine Arts in Screenwriting (Rochester Institute of Technology) and editing (FAMU, Prague.)

She was the executive producer of the series Wild Carpathia (White Carpathia.) Her films have been watched by millions and can be found on iTunes, Amazon, Netflix.

In 2018, Oana founded the film production company *Oana Ghiocel Media.*
